We help companies connect products, processes, and people. Our process is rooted in design thinking.

#### Who are we?

Share PLM is an independent consulting firm specialized in facilitating Product Lifecycle Management changes within organizations.

We do this through a mix of change enablement activities pertaining to learning, user experience, and communication improvements.

Our team consists of a unique combination of strategic advisors and practitioners with hands-on experience in the field. We have helped companies like Atlas Copco, Metso Outotec, Salomon, Konecranes, and FLSmidth embark on their PLM journeys.

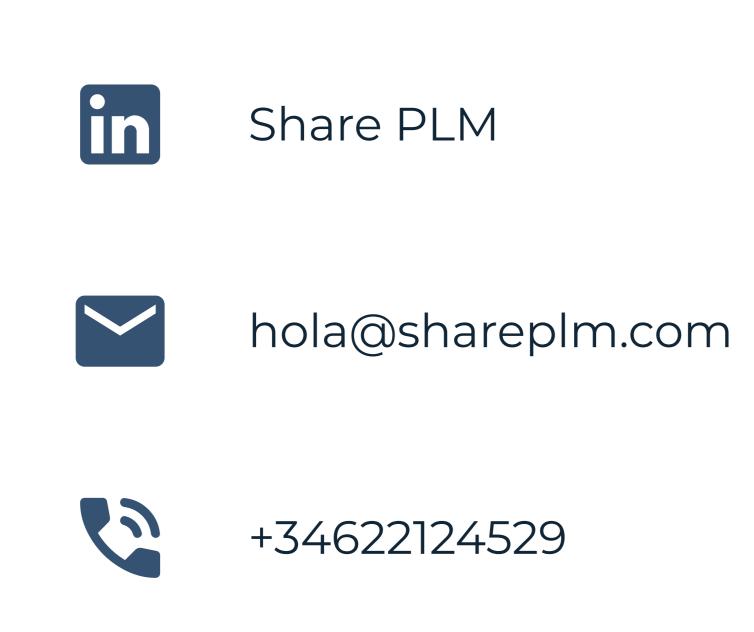

## Accelerate your PLM Transformation

With a plan defined, we'll tackle the three most important change enablement pillars: learning, user experience, and communication.

# Get in touch

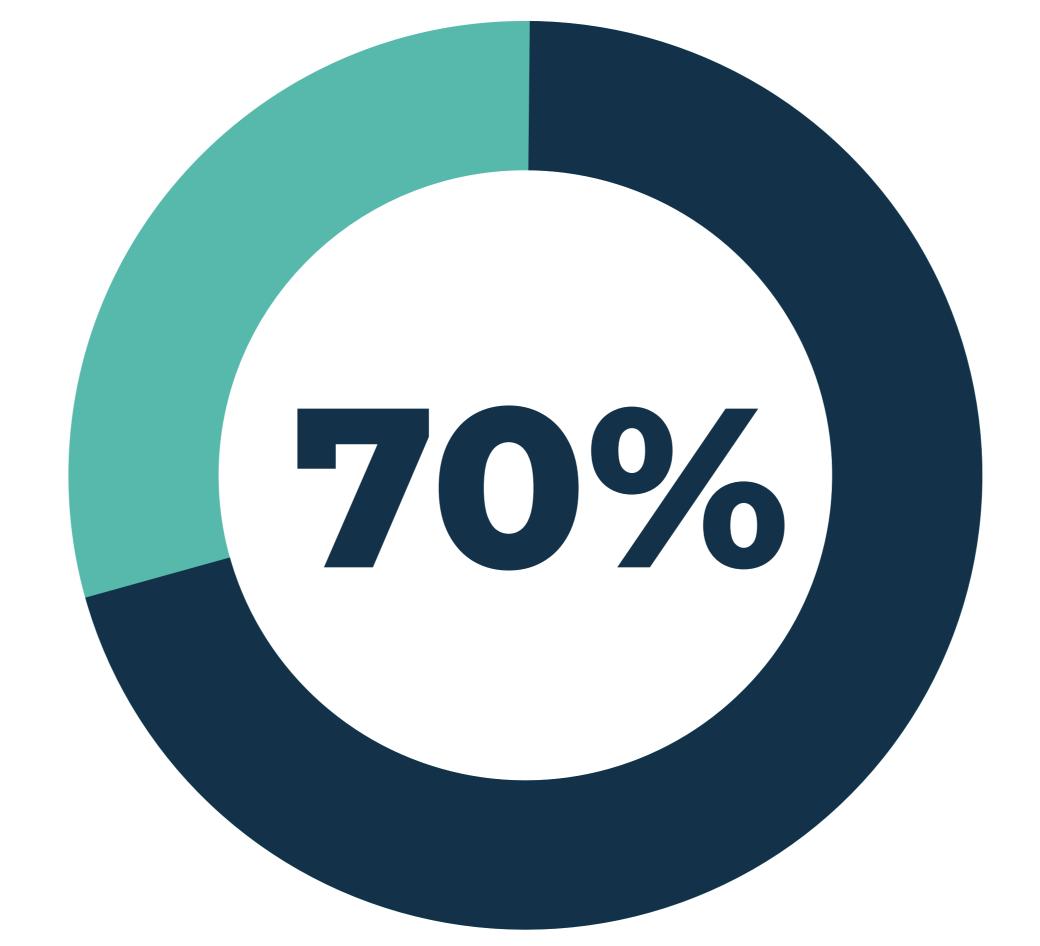

# Share PLM

Supporting companies in the midst of their PLM transformation

www.SharePLM.com

of large-scale transformations fail to meet their objectives. The main reason? Poorly managed change.

# Why do people resist change?

A lack of understanding

A dislike for the system

A lack of trust in the system

# Turn resistance into support

Learning to help people understand the "why" and the "how"

User Experience to facilitate onboarding and improve adoption

Communication to convey the vision and the plan in a compelling way

#### People-first approach

At Share PLM, people are always at the center of our work. We work at the intersection of technology, business, design, and psychology. Providing real, impactful results – always.

### To win at PLM, companies need to bring their people on board

Most PLM initiatives start with technology, typically forgetting the people involved. If people can make or break a PLM transition, why do so many companies seem to ignore this critical ingredient?

### Why work with us?

With an eye toward simplicity and user experience, our team here at Share PLM helps companies connect products, processes, and people. We help you enable the big change that a PLM transformation requires.
